PROFESSIONAL SUMMARY

Computer Engineering student (expected June 2027) with three technical internships in security monitoring and DevOps (Wazuh SIEM, Docker, Linux/Windows Server), vulnerability assessment and hardware. Projects in ML, IoT and web (2nd place, NASA Space Apps 2025). Open to internships, part-time, freelance and remote roles.

TECHNICAL SKILLS

Programming Languages: Python, C++, JavaScript, PHP, SQL (T-SQL), Verilog
Security & Monitoring: Wazuh (SIEM rules and alerting), Zabbix, Nmap, Bettercap, Kali Linux, Windows event auditing
Systems & DevOps: Linux (Ubuntu Server), Windows Server, Active Directory, Docker, VMware Workstation, Git/GitHub
Hardware & Networking: Workstation assembly, BIOS/UEFI, hardware diagnostics, benchmarking, Cat6/T568B cabling, RAID
Machine Learning & Data: TensorFlow/Keras, scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
Web & Databases: Flask, REST APIs, React, Vite, Tailwind CSS, HTML/CSS, MySQL, Microsoft SQL Server, Firebase
Spoken Languages: Turkish (native), English (B2)

TECHNICAL INTERNSHIP EXPERIENCE

Hardware Engineering Intern, KhanTech Bilişim Teknolojileri A.Ş., Istanbul (Hybrid) Jul 2026 – Aug 2026
- Assembled CAD workstations (i9-14900K, DDR5/ECC, RTX A4000) for CATIA/SOLIDWORKS: UEFI, Windows 11, drivers.
- Benchmarked builds (HWiNFO, MemTest86, Cinebench); diagnosed and fixed failing RAM, a dead PSU and CPU throttling.
- Terminated and tested Cat6 (T568B) cables, connected switches, re-labeled a 42U rack and asset-tagged equipment.

Research and Development Intern, IEEE FBU Student Branch R&D Lab, Istanbul Apr 2026 – Jun 2026
- Tested a tracker system and ongoing software projects for vulnerabilities; reported risks and recommended fixes (part-time).

DevOps Intern, Gardiyan System Security Technologies, Istanbul Jul 2025 – Aug 2025
- Built Ubuntu Server and Windows Server/AD labs on VMware; ran Docker stacks via docker-compose and Portainer.
- Wrote custom Wazuh rules for AD events (4728/4729, 4625) and set up email alerts via Postfix relay to Microsoft 365.
- Helped tune Zabbix; ran recon and network-attack labs (Nmap, Bettercap, SMB) and wrote a remediation checklist.

SELECTED TECHNICAL PROJECTS

ExoDeep AI: Exoplanet Classification | TensorFlow/Keras, Flask github.com/ezgerdog/exoplanet-ai-detection
- Five-person team, NASA Space Apps 2025 (2nd place): classifies TESS objects as confirmed, candidate or false positive.
- Neural network, ~78% team-reported accuracy; my part: HTML UI, data analysis, Flask REST API, CSV batch prediction.

Network Intrusion Detection on CIC-IDS2017 | Python, pandas, scikit-learn github.com/ezgerdog/cybersecurity-data-mining
- Six-person team: class-weighted Random Forest on 9 selected features; 0.75 macro-F1, 99% accuracy on 565K flows.
- My part: exploratory data analysis and EDA visualizations (Jupyter, pandas, Matplotlib, Seaborn).

Zero Waste Smart Fridge (IoT) | ESP32, Firebase, Flutter, Python github.com/ezgerdog/smart-fridge-project
- Three-person team: ESP32 sensors and camera sync to Firebase; a Flutter app scores each item's spoilage risk and alerts.
- My part: the project's web application (backend and frontend); also helped teammates with the hardware.

MIX CREW Website (Client Project) | React, Vite, Tailwind CSS github.com/ezgerdog/mixcrew-website
- Responsive single-page site for an Istanbul event staffing brand, with gallery, team and enquiry form.

Smart City Issue Reporting System | PHP, MySQL, Docker github.com/ezgerdog/smart-city-reporting-system
- Team project; my part: backend (PHP/MySQL, session roles, admin workflow, PHPMailer, Docker) and frontend.
- Hardened with bcrypt hashing, prepared statements, CSRF tokens and validated image uploads.

10-bit Custom CPU | Verilog: FSM control, 9 instructions, testbench github.com/ezgerdog/custom-cpu-design-verilog

EDUCATION

Bachelor of Engineering (B.Eng.) in Computer Engineering, Fenerbahçe University, Istanbul Sep 2022 – Jun 2027 (expected)

CERTIFICATIONS & AWARDS

- **2nd Place, NASA International Space Apps Challenge 2025, Akşehir Local Event** (Team HexaBits), Oct 2025
- **Python Programming for Data Science**, Miuul, May 2025 (Credential ID: z3zz2uqmaw)
- **Basic Linux 101** and **Basic Network Training**, Turkcell Geleceği Yazanlar, Aug 2025

LEADERSHIP & ADDITIONAL EXPERIENCE

Partnerships Coordinator, IEEE FBU Student Branch, Istanbul Nov 2025 – Oct 2026
- Led sponsorship and partnerships; with the team, secured ASELSAN and Youthall for the IEEE Türkiye Presidents' Workshop.

Food and Beverage Assistant, Six Flags Great Adventure, NJ, USA (CIEE Work & Travel) Aug 2026 – Oct 2026
- Served guests in a fast-paced theme park; communicated in English with customers and a multicultural team.
