PROFESSIONAL SUMMARY

Computer Engineering student (expected June 2027) with three technical internships in security monitoring and DevOps (Wazuh SIEM, Docker, Linux/Windows Server), vulnerability assessment, and hardware. ML projects: an intrusion detection model and an exoplanet classifier (2nd place, NASA Space Apps 2025 Akşehir). Open to new fields and eager to learn.

TECHNICAL SKILLS

Programming Languages: Python, C++, SQL (T-SQL), PHP, Verilog
Security & Monitoring: Wazuh (SIEM rules and alerting), Zabbix, Nmap, Bettercap, Kali Linux, Windows event auditing
Systems & DevOps: Linux (Ubuntu Server), Windows Server, Active Directory, Docker, VMware Workstation, Git/GitHub
Hardware & Networking: Workstation assembly, BIOS/UEFI, hardware diagnostics, benchmarking, Cat6/T568B cabling, RAID
Machine Learning & Data: TensorFlow/Keras, scikit-learn, pandas, NumPy, Matplotlib, Seaborn, Jupyter Notebook
Web & Databases: Flask, REST APIs, PHP, MySQL, Microsoft SQL Server, HTML/CSS
Spoken Languages: Turkish (native), English (B2)

TECHNICAL INTERNSHIP EXPERIENCE

Hardware Engineering Intern, KhanTech Bilişim Teknolojileri A.Ş., Istanbul (Hybrid) Jul 2026 – Aug 2026

- Assembled and configured high-performance CAD workstations (Intel Core i9-14900K, DDR5/ECC, NVMe, NVIDIA RTX A4000) for Dassault Systèmes 3DEXPERIENCE, CATIA and SOLIDWORKS users: UEFI setup, Windows 11, certified drivers.
- Benchmarked builds (HWiNFO, MemTest86, Cinebench); diagnosed and fixed failing RAM, a dead PSU and CPU throttling.
- Terminated and tested Cat6 (T568B) cables, connected switches, re-labeled a 42U rack and asset-tagged equipment.

Research and Development Intern, IEEE FBU Student Branch R&D Lab, Istanbul Apr 2026 – Jun 2026

- Performed vulnerability assessments on ongoing software projects and analyzed their potential security risks (part-time).
- Wrote technical reports with recommendations for improving application security.

DevOps Intern, Gardiyan System Security Technologies, Istanbul Jul 2025 – Aug 2025

- Built Ubuntu Server and Windows Server/AD labs on VMware; ran Docker stacks via docker-compose and Portainer.
- Wrote custom Wazuh rules for Active Directory events (Domain Admins changes 4728/4729, disabled-account logins 4625).
- Set up Wazuh email alerts via a Postfix relay to Microsoft 365 (TLS); helped tune Zabbix pollers and caches.
- Ran recon and network-attack labs (Nmap, Bettercap, SMB) and wrote a remediation checklist.

SELECTED TECHNICAL PROJECTS

ExoDeep AI: Exoplanet Classification | TensorFlow/Keras, Flask github.com/ezgerdog/exoplanet-ai-detection

- Five-person team, 48-hour NASA Space Apps Challenge 2025 (2nd place, Akşehir local event): classifies TESS objects as Confirmed, Candidate, or False Positive.
- Grid-searched dense neural network (4 hidden layers), ~78% team-reported accuracy. My part: HTML interface, data analysis, and model integration into a Flask app with a JSON REST API and CSV batch prediction.

Network Intrusion Detection on CIC-IDS2017 | Python, pandas, scikit-learn github.com/ezgerdog/cybersecurity-data-mining

- Six-person course team: cleaned flow data, dropped host IDs (IPs, ports), kept 9 information-gain features.
- Class-weighted Random Forest: 0.75 macro-F1, 99% accuracy on 565,566 flows; Web Attack and Bot F1 just 0.25.

Smart City Issue Reporting System | PHP, MySQL, Docker github.com/ezgerdog/smart-city-reporting-system

- Solo PHP/MySQL app: photo issue reports, four-state admin workflow, session roles, PHPMailer, Dockerfile.

Additional Projects

- **10-bit CPU (Verilog):** FSM control, 9 instructions, testbench. github.com/ezgerdog/custom-cpu-design-verilog

EDUCATION

Bachelor of Engineering (B.Eng.) in Computer Engineering, Fenerbahçe University, Istanbul Sep 2022 – Jun 2027 (expected)

CERTIFICATIONS & AWARDS

- **2nd Place, NASA International Space Apps Challenge 2025, Akşehir Local Event** (Team HexaBits), Oct 2025
- **Python Programming for Data Science**, Miuul, May 2025 (Credential ID: z3zz2uqmaw)
- **Basic Linux 101** and **Basic Network Training**, Turkcell Geleceği Yazanlar, Aug 2025

LEADERSHIP & ADDITIONAL EXPERIENCE

Partnerships Coordinator, IEEE FBU Student Branch, Istanbul Nov 2025 – Oct 2026

- Ran sponsor outreach and partnership proposals; with the team, secured sponsors incl. ASELSAN and Youthall for the IEEE Türkiye Presidents' Workshop (300+ student leaders).

Food and Beverage Assistant, Six Flags Great Adventure, NJ, USA (CIEE Work & Travel) Jul 2026 – Oct 2026

- Served guests in a fast-paced theme park; communicated in English with customers and a multicultural team.
